

STUDY TOURS 2009 - Recharge your geological batteries!

Don't let the chance slip away Book Now...

Enter our world of geology...

We're famous for our geological study tours, having visited numerous locations since 1997. You can learn about geology and the landscape in a relaxed and friendly atmosphere with like-minded people. Our tours are suitable for everyone with an interest in geology and natural history. All our 2009 tours are based in comfortable hotels and guest houses where we can enjoy good food and hospitality and the friendliness of a small group.

Chris Darmon BSc. has been organising and leading geological tours for over 30 years and brings his vast experience to running these tours around the UK and overseas. His teaching style is relaxed and informal and encourages discussion about a wide range of subjects.

With the credit crunch, everyone has to watch the money and we have endeavoured to bring you good value allied with a good standard of service. With this in mind we've added to value for money short breaks, in June and October.

Amazingly, since we launched our programme back in November, bookings have been excellent and we've added a couple of extra tours, both of which offer excellent value for money.

All these tours WILL RUN as advertised!

Here's what to do...

Once you have decided which tour to join, you will need to get hold of a brochure and booking form. You can view brochures for individual tours online at www.geosupplies.org.uk or we can mail one to you – just ring us!

We're waiting to hear from you!

The 2009 programme update...
